

MYEYE NETWORKING & INSTALLATIONS

Clarendon
myeyegroup1@gmail.com

Established 2022

Company Summary

Myeye Networking & Installations was founded in 2022. We are dedicated to helping our clients welcome and integrate into the rapidly growing technological landscape of today.

Our founder and C.E.O Paul Binger was inspired to start this company after having the opportunity to work with multiple tech companies and saw where there were so much more that could be done in quality of service to clients and treatment of staff.

Our goal is to make the lives of regular Jamaicans easier through the use of technology by making it more affordable and more accessible while maintaining quality of service.

Mission

We aim to "**Transform**" Jamaica's image through technology by providing our clients with "time **Efficient**" service. Finding better, new and "**Creative**" ways to help Jamaicans integrate into the world of tech. Through "**Hard Work**" and healthy work force, customer and company relations, we will achieve our vision.

Values

To be the number one name, (the go to) for networking and telecommunications services firstly in Jamaica, the Caribbean and the world.

Vision

Meet the Team

Kasheem Duffus

A modern, two-story white vacation home with a large swimming pool, lounge chairs, and umbrellas. The house has large windows and balconies. The pool is surrounded by a concrete deck with several lounge chairs and umbrellas. The sky is clear and blue.

Morgan's Cliff vacation home project

- 15 cameras
- 15 access points
- 32 ports
- Firewall
- Switches
- Full Network topology
- Seamless Wi-Fi connection through out the entire compound

Growth Strategy

As the company is new there aren't many noteworthy projects that we've undergone as a company. However we are eager to get out there and make our mark and build the Myeye name and brand. One such way we plan on achieving this, is through connecting and partnering with reputable, new and established architecture and construction firms. This we believe, along with our hard work and hunger to be great can Make **MYEYE** the company for all I.T and tech installation needs.

The future

Fresh out the starter blocks and we are already looking to our future. by taking steps to enter into the realm of distribution. In hopes of making it easier to source tech hardware/device for those in the service industry as well as clients that want to DIY.
